RE: Santan Expansion Project
ACC Case No. 105
Docket Control No. L00000B-00-0105

Dear Sir:

Given the current California electric utility crisis, and the resulting problems this crisis has caused for both the business community and general population, I want to convey my personal support for SRP's Santan expansion project. I urge you to approve this project so we do everything possible to provide and assure a continual, affordable source of electrical power to the Phoenix marketplace.

Sincerely,

PULTE HOME CORPORATION

AZ CORP COMMISSION
DOCUMENT CONTROL

Dear Commissioner Marc Spitzer:

I urge you to approve the Santan expansion. With increasing growth in Phoenix and surrounding areas, our electric system is having difficulty producing enough energy to supply the demand. There is little chance of bringing in more from other states — California needs that supply.

Growth won't slow down and we will soon be in the same position as California who hasn't modernized or expanded their capacities.

Since only about 2% of Gilbert's population is against the Santan expansion, I feel the minority is ignoring the very real certainty of rolling blackouts and higher rates.

I have lived in Tempe 41 years with SRP energy and hope it continues to be able to operate as efficiently as in the past.

Sincerely,

Darlene Telles

To: Bill Mundell, Arizona Corporation Commission
From: Katherine E. Watson, Gilbert Resident
2913 East Temple Court, Gilbert, AZ 85296
Regarding: Expansion of Salt River Project's San Tan Power Plant L-00000B-00-0105

Acutely aware of the difficult decision you have before you in whether or not to sanction the expansion of the plant at its current location, please consider the following points among the many that you are weighing:

1. Those of us who recently moved to Gilbert may have done as I did and that was to inquire about the source of steam that was markedly visible near the intersection of Warner and Val Vista. Learning that it was an S.R.P. plant on a vast acreage, I drew two conclusions: one was that its power provided the energy that my home and this community required; and the other was that the growth not only of this area but of this state and surrounding ones would require additional demands from a variety of sources in the future. Therefore, it seemed likely that someday enlargement of the facility would be necessary and would probably be at this site for economic reasons. Not only had land been wisely set aside for such future purpose, but major lines and easements had already been established from this point.

2. Acknowledging the possibility of expansion, I wondered what the future impact would be upon my daughter's family in Finley Farms, one-half mile due north of the plant, and upon me in my new residence in Scott Homes, one mile due east, in so far as health and safety issues were concerned. S.R.P. has stated in the meetings, that I have since attended, that the new "state of the art" facility will meet all of the air quality standards necessary for protection of the public.

However, I am uninformed as to the nature and safety of the substances necessary to be stored and used in the production of power, not because anyone was evasive, but because I neglected to ask this specific. Will this have the potential of a danger to the homes situated close by? This question you might pose, and if the answer is reassuring then I have no other concerns.

Having been a native of this state for my sixty-nine years, I have a bias towards certain corporations that have consistently earned my respect. Because of Salt River Project's exemplary management as well as its sound history in the development of this valley, I feel a confidence in their word that others may dispute. Therefore, pragmatism indicates that the expansion of this site is necessary to meet increased energy demands, and deserved trust indicates Salt River Project's request should be considered and honored.

Help

Mr. Mark Spitzer,

Please! Please! Please! allow SRP to build the San Tan Expansion Project here in Gilbert, Arizona.

We have been residents of Gilbert for 5 years. We love our town. We want our town to be the best. A generating station will not bring housing prices down. A generating station as planned by SRP will enhance our town with many contributions, both aesthetically and financially.

As Arizona continues to grow, you know the need for energy is very important. Especially with our hot summers, how could we possibly afford not to build the San Tan Expansion Project. SRP will be a great neighbor!

Sincerely
 Catherine M. Wolff
 Gilbert Arizona

Dear Mr. Marc Spitzer

It was brought to my attention that the expansion of the SRP plant on Val Vista & Warner will have toxins discharged that I find unhealthy.

I truthfully am very upset that this expansion will occur without any knowledge when we purchased our home. This would have been a major deterrent.

As I exercise every morning to keep myself healthy to "care" for my young children I will be breathing in toxic air.

It is unfair to subject people who have worked hard for our homes to a power plant (that is toxic) in an area that isn't necessary.

I ask you to please reconsider your options in location. This location will affect many of us. Please consider the long term effect on a 13 month old & 5 1/2 year old child. What if this were

your neighborhood? Would you still be so adamant?

You are hearing the voice of the people. There are other options for location.

Please reconsider.....

This location is too close to so many homes.

I appreciate your time reading this letter.

Sincerely,

Johny John

Re: The Santan Expansion Project, Case No. 105

Dear Commissioners:

I am writing on behalf of Banner Health System, the non-profit parent company of Desert Samaritan Medical Center and other major health facilities in the east Valley, to urge your approval of the Salt River Project's proposed Santan Expansion Project in the Town of Gilbert.

While our hospitals are equipped to function in the event of normal power failures, we are concerned over prospects that the east Valley could face power shortages, brownouts and forced outages unless additional generation resources are secured in the next few years. For reasons of safety, cost control and delivery of high quality medical services, it is imperative that Banner Health System's East Valley facilities be assured of a reliable, reasonably-priced power.

The Santan Expansion Project will ensure future power delivery to Desert Samaritan, Mesa Lutheran Hospital, Valley Lutheran Hospital and other Banner Health facilities in Mesa and Gilbert. Any decision that would delay or escalate costs of supplying electricity to Banner Health System's East Valley hospitals and medical centers could be deleterious to our patients, medical staff and hospital operations totaling more than 1,000 beds.

We concur with the Arizona Power Plant and Line Siting Committee's conclusion that the Santan Expansion Project offers an appropriate way to meet regional energy needs using a technology that will meet or exceed all state and federally monitored environmental and safety standards.

Sincerely,

Chuck H. Welliver
President, Arizona Region

Santan Expansion

The Hon. Bill Mundell
Chairman, Arizona Corporation Commission
1200 W. Washington Street
Phoenix, AZ 85007-2996

Dear Commissioner Mundell:

The Chandler Chamber of Commerce strongly endorses the expansion of the Salt River Project's proposed San Tan Power Plant. We strongly believe that this project is essential to economic development and the failure to approve the plant would leave the area at risk of power shortage.

Sincerely,

Carol K. Baily
President & CEO
